报告人： **Prof. Hongbo Zhou**

(Principal Research Geophysicist for Kaleidoscope project in Repsol USA)

报告题目：

The Kaleidoscope Project

邀请人： 张林波研究员

报告时间： 2009 年 7 月 9 日(周四)

上午 10:00—11:00

报告地点： 科技综合楼三层 311

计算数学所报告厅

Abstract:

In this presentation, I will talk about the past, the current, and the future status of the Kaleidoscope project. Specifically, I will first review the Cell architecture, and then the implementation of the RTM (reverse–time migration) on cell blades, and finally, I will move on to the inverse problem on wave propagation, i.e., full waveform inversion.
