报告题目:

**Low-Rank Solutions or
Approximate Solutions of
Semidefinite Programming Problems**

邀请人: Prof. Dai Yu-hong

报告时间: 2008年9月4日(周四)

下午 4:00—5:00

报告地点: 科技综合楼三层 311

计算数学所报告厅

Abstract:

As we try to solve many optimization problems by utilizing semidefinite programming, we actually have to obtain a low-rank solution or a low-rank approximate solution to the semidefinite programming problem. In this talk we will introduce some new results and some issues need to be solved in the low-rank solutions or approximate solutions of semidefinite programming problems.
