报告题目:

**Why Interdisciplinary Research and
How to Pursue?**

邀请人: 周爱辉研究员

报告时间: **2011 年 8 月 30 日 (周二)**

下午 16: 00-17: 00

报告地点: **科技综合楼三层 311**

计算数学所报告厅

Abstract:

In this talk, I will use case studies and recent developments in numerical linear algebra and scientific computing to discuss why we do interdisciplinary research and how to pursue. Talking points include how to decide next ``big'' problem to work on, how to get involved and evolved, and how to revamp classical problems with new perspectives.
