（中国科学院大学）

报告题目：

Computational methods for stochastic optimization

邀请人： 洪佳林研究员

报告时间：2018 年 1 月 16 日（周二）

下午 16:00--17:30

报告地点：数学院南楼 702 教室

报告摘要：

Along with great developments of machine learning, statistics and many other applications, stochastic optimization has experienced significant progress in the past decade. In this talk, we will first briefly recall several types of classic algorithms for stochastic optimization and then have a look at recent developments of new algorithms.
